GoTechnology Elearning Courses

wood.

The GoTechnology elearning courses provide a flexible set of role dependant modules for learning about hub2 functionality and associated products.

The main pathway consists of Base, Core and Admin courses which provide an introduction to the application and are completed sequentially, with each course building on the previous one.

At each level there are a range of supplementary courses which cover more specific topics or investigate an area of use in more detail. These are assigned either alongside the main pathway courses or as individual modules for specific roles.

Pathway Courses

Level 1: hub2 - Base

↓

Level 2: hub2 - Core

↓

Level 3: hub2 - Admin

Supplementary Courses	
Level 1 Introductory courses aimed at users who are new to GoTechnology products and/or have read only access	hub2 - Foundation eWorkpack - Mobile App
Level 2 General courses aimed at users who are completing daily tasks in the system and are required to change or modify data	hub2 - Digital Document Awareness hub2 - Multi-Tag ITRs
Level 3 Courses for more experienced users who are familiar with the products and are performing administration tasks, importing data or managing projects	Work Packs hub2 - Drawings hub2 - Handovers hub2 - Preservation hub2 - Procedures hub2 - Reference Tables

Full descriptions for all courses are available in the course catalogue which can be found at https://gotechnology.talentlms.com/catalog
