v1.36 Release Notes

## 1. About this Document

### 1.1. Purpose

This document provides a brief overview of the changes made between V1.35 and V1.36 of GoTechnology hub2, along with where further details of each change can be found within the updated functional specification, in addition to a listing of completed bug fixes and known issues.

## 2. Fixed Issues

The following issues have been fixed in version 1.36 of hub2

Case	Title [sic]	Details
Case No	Title	Details
948	Kanban Board on Skyline showing wrong ITRs	Sometimes Tag ITRs were appearing on the Kanban Boards in the Skylines which did not belong there.  This has been fixed so that only the appropriate handovers are displayed.
939	Procedures Report Error	There was an issue with the Procedures Detailed Report where it would sometimes return only a single Procedure per System.  This has been fixed so that all appropriate Procedures are included in the generated report.
912	File Download Sizes	There was an issue where generated Digital Document file sizes had become much larger than in previous versions.  This has been fixed so that PDF files are now small again.
