GoTechnology® hub2

v1.37.2 Release Notes

1. About this Document

1.1. Purpose

This document provides a brief overview of the changes made between V1.37.1 and V1.37.2 of GoTechnology hub2, along with where further details of each change can be found within the updated functional specification, in addition to a listing of completed bug fixes and known issues.

2. Fixed Issues

The following issues have been fixed in version 1.37.2 of hub2

Case	Title [sic]	Details
Case No	Title	Details
75456 and 75590	Skyline Report not loading	The Skyline on the home page and the Skyline Reports page didn't load for some customers. This has been resolved and the Skyline now loads.
	MCC Handovers not loading	The search results on the MCC Handovers were not being returned without a filter first being chosen for some clients. This has been resolved and the search results now load.
	Failure to Generate Full Work Pack using Documentum files	Sometimes the Full Work Pack could not be generated if the Work Pack contained references to files from Documentum. This has been resolved and the Work Packs will now generate successfully.
	Documentum File Picker unable to understand some file types	The Documentum File Picker was unable to understand some uncommon file types of files being stored in Documentum. This caused no files to be shown in the file picker. This has been resolved.
	"Select Documentum File" button displayed without permissions	Sometimes the "Select Documentum File" button was being displayed when the user did not have the necessary permissions. This has been corrected.

3. Known Issues

A full list of "Known Issues" can be found at <https://qedi-gotechnology.github.io/>

4. Companion App Features

Version 1.9 of our GoTechnology hub2 Companion Application has also been released alongside GoTechnology hub2 v1.37.2.

The following issues have been fixed in version 1.10 of the Companion App.

Case	Title [sic]	Details
Case No	Title	Details
76153	Session Management	Sometimes the app became unresponsive when the user opened the app without having logged off the previous day. Session management has been improved to remove these sorts of issues associated with stale sessions.
76151	"No Authorised Person" messages	Sometime a message about "No Authorised Person" was being displayed and the app would become unresponsive or unexpectedly log the user off. The message has been rephrased to be clearer as to why an automatic log off will take place, and the unresponsiveness has been resolved.

The application can be downloaded from the App Store or the Google Play Store at the following links

- Apple: <https://apps.apple.com/us/app/gotechnology-companion-app/id1485718605>
- Google: https://play.google.com/store/apps/details?id=com.wcs.hub2DigitalDocuments&hl=en_GB
