GoTechnology[®] hub2

v1.42.2 Release Notes

1. About this Document

1.1. Purpose

This document provides a brief overview of the changes made between V1.42.1 and V1.42.2 of GoTechnology hub2, along with where further details of each change can be found within the updated functional specification, in addition to a listing of completed bug fixes and known issues.

2. Fixed Issues

The following issues have been fixed in version 1.42.2 of hub2

Case	Title [sic]	Details
89970 90002	Large imports with Sign Offs failing	Full Imports with more than 500 records that updated some sign offs would result in a "Full Import has failed. Please contact the GoTechnology Support Team" message. This issue has been corrected so that these imports will now run successfully.
90030	Digital document upload failure	Uploading a large number of digital documents that contained sign offs was sometimes failing without any feedback message to the user. This issue has been corrected so that these uploads will now complete successfully.
89945	Required fields in imports	Some imports were requesting that all Mandatory fields were included in the import file even though the entity already existed within hub2. This has been modified so that these fields do not need to be present in the import file.

3. Known Issues

A full list of "Known Issues" can be found at <https://qedi-gotechnology.github.io/>

4. Features

v1.42.2 is a patch release so includes no new features.
