V1.45.1 Release Notes

GoTechnology hub2

wood.

1. About this Document

Purpose

This document provides a brief overview of the changes made between V1.45 and V1.45.1 of GoTechnology hub2, along with where further details of each change can be found within the updated functional specification, in addition to a listing of completed bug fixes and known issues.

2. Fixed Issues

The following issues have been fixed in version 1.45.1 of hub2

Case	Title [sic]	Details
98828, 98835, 98880	Incorrect warning message in Handover imports	If a Handover had outstanding items and it was updated through the imports, a warning message saying "There are outstanding {Tag ITRs} to be completed before generating the handover" was shown in the import results file. The import could not proceed beyond this point, so the handover could not be updated through the imports.
		This has been corrected so that the warning message is no longer displayed in the results file and the import can proceed successfully.

3. Known Issues

A full list of "Known Issues" can be found at https://qedi-gotechnology.github.io/

4. Features

v1.45.1 is a patch release so includes no new features.
