

V1.49.2 Release Notes

GoTechnology hub2

1. About this Document

Purpose

This document provides a brief overview of the changes made between V1.49.1 and V1.49.2 of GoTechnology hub2, along with where further details of each change can be found within the updated functional specification, in addition to a listing of completed bug fixes and known issues.

2. Fixed Issues

The following issues have been fixed in version 1.49.2 of hub2:

Case	Title [sic]	Details
125804	Issue importing Handover Sign Offs	If a new sign off was added to an existing Handover Type, and an import was then performed for that Handover Type, an error message about invalid headers was displayed, and the import did not proceed. This has been corrected so that it is now possible to perform imports in this scenario.
n/a	Sign Off Search Fields on Procedure Handover Search	On the Search Page for Procedure Handovers, the Search Fields did not include a "Sign Offs" section. This meant it was not possible to search Procedure Handovers by sign offs. This section has now been added.

3. Features

v1.49.2 is a patch release so includes no new features.
