

V1.52.1 Release Notes

GoTechnology hub2

About This Document

Purpose

This document provides a brief overview of the changes made between V1.52 and V1.52.1 of GoTechnology hub2.

Fixed Issues

The following issues have been fixed in version 1.52.1 of hub2:

Case	Title [sic]	Details
133458	Skyline colours incorrect	In the Preservation Skyline when DOTX templates were in use, the boxes did not turn blue to indicate completion once the final sign off had been made. Instead, they remained orange. This has now been corrected so that the boxes will be displayed in blue.
134267	Incorrect error message when importing a completed Tag ITR	A generic error message was being displayed when attempting to import a Tag ITR that had already been signed off and was therefore locked. This has been corrected so that the import now proceeds, and the results file is generated with details.
134413	Level D admin pages inaccessible	Level D admin pages were inaccessible unless the user was in the level structure that the Level D belonged to. This has been changed to allow admin users to freely access Level D pages, regardless of which part of the level structure they are currently in.
134425 134369	Tag ITR import error	Imports that included adding a new Tag ITR that used a DOTX template and that already had sign offs completed were failing with a generic error message. This has been corrected.
134669	Issue saving DOTX based Tag ITRs	After the initial sign off was made on a Tag ITR that used DOTX templates, further edits were not being saved correctly. This issue only applied if the DOTX template file did not contain any bookmarks. It has now been corrected.

Features

In the 1.52 Release, we implemented a change that presented Task Tables in Digital Documents on a separate page. The goal was to optimise screen space and improve performance. However, it has become clear that this modification negatively impacted user workflow.

User input is a vital part of our software development process, and we take such feedback seriously. As a result, we have removed this feature change in 1.52.1 so that all digital document task completion is once more available on a single page.
